YOUR ZOIPER MAC APP INSTALLATION GUIDE

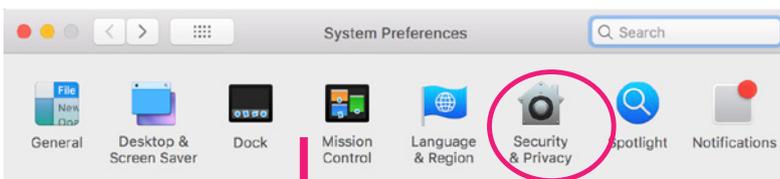

ZoIPER MAC: Before you begin

Before you download and install ZoIPER for your Mac you must first make sure your Mac is set to allow Installation of apps from identified developers.

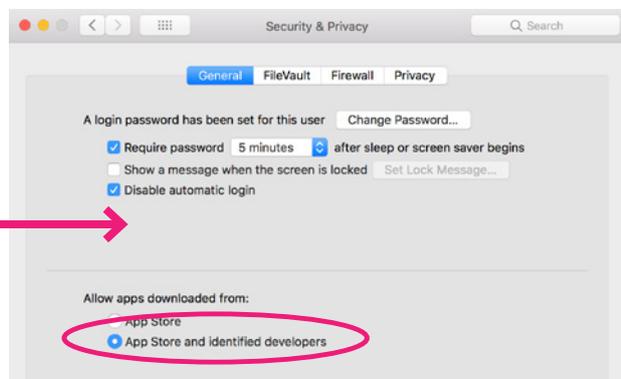

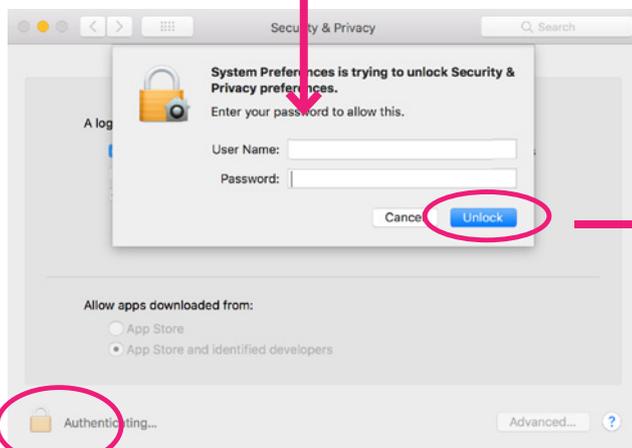

First click on the search icon (magnifying glass icon)in the top right of your finder
Type 'system' into it

The top result should be the system preferences app, identifiable from the icon. double click to launch.

Click the security and privacy icon. You may need to click on the padlock to unlock this part. so type in your mac's user name and admin password to do so when required.

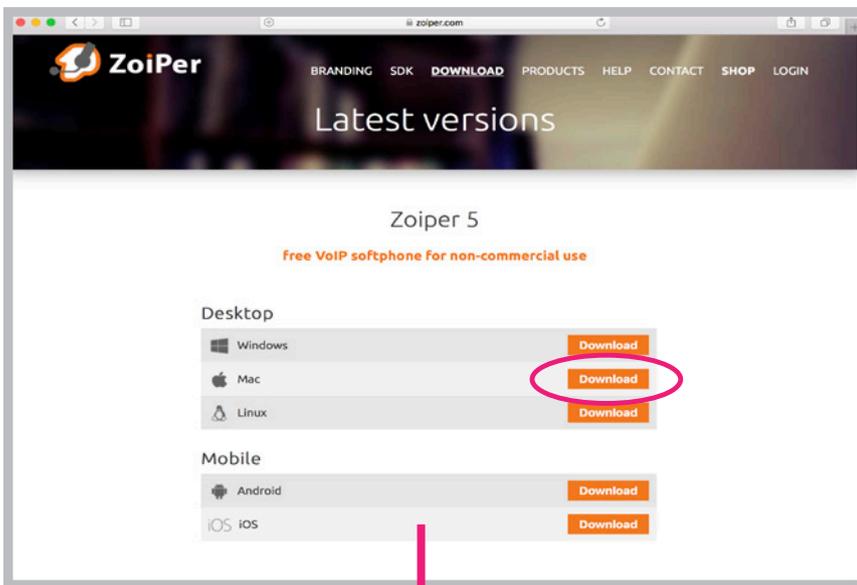

Make sure 'App Store and Identified Developers' is highlighted. Click the padlock to lock in the change and once done quit System Preferences

YOUR ZOIPER MAC APP SET-UP GUIDE

ZoIPER MAC Setup

Launch the Zoiper app.

On the next page type the 'AUTH NAME' you have been given in the top box and add the following at the end of it: @jjpbx.co.uk

Please make sure you are typing the AuthName we supplied! Then on the end of this add @jjpbx.co.uk

So on the top line it will read YourAuthName@jjpbx.co.uk (it will not be this) It should read something like 201-BARNS001@jjpbx.co.uk or similar (see below)

Click to [Continue as a Free user](#)

Next type in the 'password' we have supplied to you.

Click 'Login'

On this next page **your 'hostname' should already be filled in. If not please type jjpbx.co.uk in the box and click 'Next'**

On the next screen, please type in your 'Auth Name' again (this was supplied to you in the email) and the domain again, **which again is jjpbx.co.uk**

Click 'next'
